Profile

Senior IT leader and full-stack engineer with 10+ years across Enterprise IT and automotive manufacturing. Combine hands-on engineering (Angular, TypeScript, Node.js/.NET, SQL, Keycloak) with Agile delivery (Scrum, SAFe), stakeholder management, and conflict resolution to align technology with business outcomes. As BRM/IT consultant and project lead, led a local datacenter transformation—optimizing scope and vendor model to cut a planned 5-year budget from €1.5M to €170k while maintaining SLAs and operational stability. Track record of modernizing platforms, introducing CI/CD, and motivating high-performing teams; recognized for lateral leadership and clear communication from shop floor to C-level.

Employment History

IT and Software Professional, Mercedes-Benz G GmbH, Graz

JUN 2024 – PRESENT

- **Business Relationship Manager & IT Consultant (Engineering)**
 - **Lateral Leadership:** Bridged Engineering and IT departments, aligning conflicting stakeholder interests with strategic business goals.
 - **Conflict Resolution:** Navigated departmental silos and high-pressure negotiations to streamline digitalization roadmaps.
 - **Team Building:** Mentored cross-functional project teams and motivated external providers to exceed SLA requirements.
- **Project Lead | Datacenter Transformation**
 - **Strategic Optimization:** Re-engineered a 5-year project scope, slashing the planned budget from €1.5M to €170k (88% saving) while maintaining full operational stability.
 - **Stakeholder Management:** Influenced executive buy-in for lean infrastructure by prioritizing critical requirements over legacy "nice-to-haves."
 - **Operations Oversight:** Primary lead for datacenter operations and third-party service provider management.
- **Full-Stack Developer**
 - **End-to-End Delivery:** Architected and deployed scalable apps using Angular, Node.js, and MSSQL with Keycloak authentication.
 - **Tech Stack:** TypeScript, SCSS, Jest, Express.
 - **Agile Leadership:** Championed Agile practices to accelerate development cycles and increase team transparency.

Full Stack Developer, Rockets Investments GmbH, Graz

FEB 2022 – MAY 2024

- **Change Management:** Led the high-impact re-branding initiative and successfully migrated legacy JSP web architecture to Angular, improving performance and scalability.
- **IAM Modernization:** Spearheaded the implementation of Ory Kratos as the new enterprise Identity and Access Management (IAM) framework.
- **Backend & DevOps:** Optimized legacy Java backends and introduced GitLab CI/CD pipelines to automate deployments and increase release velocity.
- **Infrastructure Leadership:** Orchestrated office relocation technical strategy; designed network infrastructure and negotiated high-value ISP contracts and tariffs.
- **Operational Standardization:** Transformed workplace operations by creating a centralized hardware/software inventory and standardizing the employee onboarding process.

Full Stack Developer, DCCS GmbH, Graz

AUG 2019 – JAN 2022

- Full stack developer
- Back-end: .NET Framework
- Front-end: React, React Native, Angular, Dojo Toolkit
- Worked with Scrum methods
