## Profile

Senior IT professional and full-stack engineer with 10+ years across enterprise IT, software development and automotive manufacturing. Combining hands-on engineering (Angular, TypeScript, Node.js, .NET, SQL, Keycloak) with Agile delivery, stakeholder management and cross-departmental leadership to align technology with business outcomes. As BRM and project lead at Mercedes-Benz, led a datacenter transformation that reduced a planned five-year budget from €1.5M to €170k while maintaining SLAs and operational stability. Track record of modernising platforms, introducing CI/CD and enabling high-performing teams across technical and non-technical stakeholders.

## Skills

- |                   |                     |                         |                |
|-------------------|---------------------|-------------------------|----------------|
| • Angular / React | • TypeScript        | • Node.js / NestJS      | • .NET         |
| • Java            | • MSSQL / MongoDB   | • Keycloak / Ory Kratos | • GitLab CI/CD |
| • Docker          | • JIRA / Confluence |                         |                |

## Employment History

### IT and Software Professional, Mercedes-Benz G GmbH, Graz

Jun 2024 to Present

#### Business Relationship Manager & IT Consultant (Engineering)

- Bridging Engineering and IT departments, aligning conflicting stakeholder interests with strategic business goals and digitalization roadmaps.
- Navigating departmental silos and high-pressure negotiations to deliver consensus on infrastructure and tooling decisions.
- Mentoring cross-functional project teams and managing external service providers against defined SLAs.
- Managing project backlogs and documentation in JIRA and Confluence.

#### Project Lead — Datacenter Transformation

- Re-engineered a five-year project scope, reducing the planned budget from €1.5M to €170k (88% saving) while maintaining full operational stability.
- Secured executive buy-in for a lean infrastructure approach by prioritising critical requirements over legacy scope.
- Primary lead for datacenter operations and third-party service provider management.

#### Full-Stack Developer

- Architecting and deploying internal applications using Angular, Node.js/NestJS, MSSQL and Keycloak authentication.
- Tech stack: TypeScript, SCSS, Jest, Express, WebSocket, Electron.

### Full Stack Developer, Rockets Investments GmbH, Graz

Feb 2022 to May 2024

- Drove the consolidation of three independent crowd-investing platforms into a single unified brand (ROCKETS), serving approximately 50,000 registered investors across Austria, Germany and Switzerland.
- Executed the full-stack platform merge: migrated three legacy JSP frontends into one Angular application, unified Java backends and data models, and introduced GitLab CI/CD pipelines for continuous delivery.
- Replaced a custom-built authentication system with Ory Kratos, introducing self-service registration, account recovery and MFA/2FA — reducing identity-related support tickets and aligning with GDPR requirements.
- Designed network infrastructure for office relocation and negotiated ISP contracts.
- Built a centralised hardware/software inventory and structured onboarding process, reducing new-hire ramp-up time.
- Tech stack: Angular, TypeScript, Java, JSP, Ory Kratos, GitLab CI/CD.

### Full Stack Developer, DCCS GmbH, Graz

Aug 2019 to Jan 2022

- Delivered client projects ranging from two months to three years for customers in Austria and Germany, working across Angular, React, React Native, .NET and Dojo Toolkit.
- Contributed to a logistics management dashboard for Mercedes-Benz, delivering frontend components and integrating with backend services.
- Built the first MVP for Firmenradl.at, a corporate bicycle leasing platform, using WEBCON as the backend workflow engine.
- Worked in Scrum teams with sprint planning, daily stand-ups and story estimation across all engagements.
- Tech stack: Angular, React, React Native, .NET, Dojo Toolkit, WEBCON.

### System administrator and Test planner, Magna Steyr, Graz

Apr 2017 to Jul 2019

- Supported and extended the internal Manufacturing Management System (MMS), including connection of new production lines.
- Provided 3rd-level support and trained new employees on MMS operations.
- Member of the planning team for new production line decisions and rollouts.

### Teamleader, Magna Steyr, Graz

Feb 2016 to Mar 2017

- Led a 20-person night shift team, ensuring output quality and safety compliance.
- Produced daily shift reports, optimised resource allocation and resolved conflicts to maintain team cohesion.
- Partnered with project managers on cost and resource planning.

## **Infantry Soldier (KIOP/KPE), Austrian Armed Forces, Klagenfurt am Wörthersee**

May 2012 to Jan 2016

- Contract soldier with a six-month KFOR deployment in Kosovo.
- Operated in multinational teams under high-pressure conditions with strict safety and communication protocols.

## **Body shop technician, Magna Steyr, Graz**

Sept 2008 to Apr 2012

- Completed apprenticeship and worked as a production technician.

## **Languages**

---

German, English, Norwegian

## **Education**

---

### **FH Joanneum, Graz**

Diplom-Ingenieur, Oct 2021 to Oct 2023

Software and Digital Experience Engineering

### **FH Campus 02, Graz**

Bachelor of Science in Engineering, Oct 2018 to Jul 2021

Business Software Development

### **HTBLVA Bulme, Graz**

A level certification, Sept 2016 to Sept 2018

Evening school with graduation in German, English, mathematics and mechanical engineering

## **Certifications & Courses**

---

### **Certified SAFe 6 Agilist**

Oct 2025

### **Certified IPMA Level D**

May 2020

### **ITIL v4 Foundation**

May 2021

### **Sicherheitsvertrauensperson, AUVA**

Mar 2018

### **IREB Certified Professional for Requirements Engineering — Foundation Level**

Expected May 2026
